## Product Functions

The videsur viewer is a new product and vision camera peephole. It uses digital chips and adopts the latest technology. Its special connection structure does not destruct the existing door structure, while the installation and the usage of the viewer are very easy. The viewer is a genuinely useful high-tech home safety product, and it will switch off after ten seconds automatically to save power life.

## Benefits from the Peephole viewer:

- | Enjoy a white-collar high-grade and high-quality safe life
- | Children who are not tall enough, and the poorer eyesight aged can easily and clearly see people outside front doors.
- | Easy and safe one-button operation: After you press the touch button, you can see a big image on the display. The “wide angle facing outside front door” is 70 degrees.
- | Photo-shooting and storage for evidence, making your family members’ lives even safer
- | Simple DIY, patented design, and no construction required: a three-minute quick assemblage of parts of the Oviewer; the operation of the product is simple and convenient

## Comparison between Traditional Peephole and viewer:

## Installation Diagram:

Using existing door eye, patented design, no destructive assembly of parts of video viewer, wireless, no tools required, immediate installation for immediate use

## Product Features:

- ◎ Easy and safe one-button operation: After you press the touch button, you can see a big image on the display. The image is even clearer and you feel even safer. The viewer is even more fashionable.
- ◎ Photo shooting and storage for evidence: This function allows your family members' lives to be even safer and more secure.
- ◎ High resolution images: clear LCD screen, focused and vivid images, better than traditional door eyes
- ◎ Simple DIY without construction: a five-minute quick assemblage of parts of the viewer; the operation of the product is simple and convenient.
- ◎ The visibility of images on the LCD screen is better than the visibility shown on the traditional door eye: The digital door viewer can clearly produce images, unlike traditional door eyes which distort images. The adoption of the advanced low illumination technology allows you to also see clearly on the viewer when visitors are in dark corridors.
- ◎ For any people: Both children who are not tall enough, and the aged with poorer eyesight can easily and clearly see people outside from doors.
- ◎ Super power saving: 2 AA batteries – special power management technology
- ◎ Super large field of view: You can view images produced from a super large “wide angle facing outside the front door.”
